Reno, Nevada

## **Formula SCCA Cars Added To The San Francisco Region.**

Josh Platt has acquired FSCCA Chassis #83 from MLC Motorsports, LLC. The sale took place on May 21, 2006 when the car was delivered to Josh at his Chico shop. "When my team partner, Jerry Douglas and I had an opportunity to test drive the FSCCA car at Reno-Fernley Raceway recently we were really impressed by the performance and handling of the car" stated Platt. "Additionally, as a business person operating costs were very important to me, the "spec" aspect of the car and low per race costs really got my attention. The drivers in the San Francisco Region come to the track to race not work on their cars" continued Josh.

"We are pleased to have been able to provide a demonstration day recently that resulted in this sale" said Chuck Johnson, owner of MLC Motorsports, "We will be doing that again in the near future". "All of us look forward to having Josh and his team join us at the track for the next San Francisco Region Race at Infineon Raceway." Josh plans to acquire 2 additional FSCCA cars before the end of the year and field a 3 car race team for the 2006 season sponsored by his construction company, UCS, Inc. of Chico, CA.

We also welcome Tom Minnich of Pebble Beach, CA to the list of FSCCA owners in the San Francisco Region. Tom has purchased chassis number 71 out of Wisconsin and plans to join the growing group of FSCCA cars racing in the San Francisco Region. "I have been racing vintage cars for a number of years now and am really looking forward to campaigning this modern spec Formula SCCA car on the San Francisco area tracks" stated Minnich, he added "in researching where I wanted to go with SCCA racing the car impressed me with its low operating cost and great performance, I'm really looking forward to getting it on the track".

MLC Motorsports, LLC of Reno, Nevada and Bulldog Motorsport owned by Don Huston of Patterson, California are SCCA Enterprises, Inc.'s authorized Customer Service Representative for the Formula and Sport Racer SCCA race cars.
